**What's new:**

Welcome, Striders! Fantasy Grounds is our latest, Advanced Adventures column, so we're all excited to see the product as it's being built... This week we're diving into Advanced Adventures #3 - The Curse of the Witch Head! We discuss group dungeon challenges, silent NPCs, and things just a little more aloof. Then we all drop some dimes to present the very first of our industry-exclusive pet goodness! Stay tuned for more in the coming weeks! Almah Almah is a never-there and always silent NPC. She is in every Fezine and Fiend's Side Quest, her barks are mandatory for completing the Aid Quest. Her tenacity is described as "she is a curse that loves you," and because of this, she is very confusing. Everyone has a different experience with Almah at different times in their play - some are intimidated and blank up, some are antsy and unsure where to go. A helpful aside - you can still use Almut's concept with the current available version of FG, but it has not yet been implemented in the populated tables. We'll keep you posted on when that will be, as well as how you can get your hands on her. Challenge? Challenge Almut is now part of the Challenge feature, very much like Challenge Graardor! The only difference is that this pet you can purchase at an individual NPC instead of purchasing it with your Player Village... Challenge Almut is an exclusive to Advanced Adventure 3, which makes it a bit of a scarcity, but its relatively tiny cost is well worth the cost of its scarcity. Almut may seem very intimidating and very tough - her health is very low, which is typical for a lot of the enemies in Advanced Adventure's, and she has 2 healing per turn. When paired with a friend or two, Challenge Almut does make the task of completing a dungeon more challenging. Basically, with two PCs, you split the monsters between them, swap turn order after every monster, and help each other heal. Silent NPCs Building on pet designs from previous editions of Advanced Adventures, Silent NPCs are an especially useful addition to this edition. Many of the pets won't even talk and the Dervish even has a dialogue bug. But Silent NPCs, like their counterparts from previous editions, dramatically
