A long time ago, someone found a way to get to the Netherworld, but they are stuck in there. You can join them and enter the Netherworld, but you will have to pass all the Netherdwellers along the way! Some of the Netherdwellers are quite nasty, and don't just go by the book, and some of the Netherdwellers are a bit cute, and love to help, but some of them get a bit over-confident, and easily get themselves into

trouble. Most of the people are mortal, and some are ghosts, who have just popped into the Netherworld for some fun! If you can pass them all, and make it to the Netherworld, then you can help your friend, and they can help you! If you can stay alive, you should be okay... But don't get cocky! Staying alive may be hard. You may run into all sorts of dangers, from Zombies to Spiders, who come out at night. Some things are even invisible. The Netherworld is a strange place, and it is a very scary place, too. After passing the Netherdwellers, make sure that you can hold your own, and make sure you can take on the challenges, and get your friend out of there. If you can't make it to the Netherworld, then you can't help your friend, and you may never get out! If you make it, you can bring your friend out, and you can even play with the Netherdwellers, in their own worlds! This is one of the craziest games out there. Sadly, he did not find out until too late that he had Alzheimer's Disease. After he realized the seriousness of the disease, he became determined to make sure that the people who were left behind would not experience the same heartache that he did. He used his background in technology, his skills as a gifted student, and his wealth of knowledge on how to care for a person with Alzheimer's disease to benefit a nation founded on individualism, innovation, and independence.
